env polyprotein - avian reticuloendotheliosis vi.
N.Alternate names: coat polyprotein
N.Contains: coat protein gp23
C.Species: avian reticuloendotheliosis virus
C.Date: 28-Aug-1985 #sequence_revision 28-Aug-198
C.Accession: A03999
R.Wilhelmsen, K.C.; Eggleton, K.; Temin, H.M.
J. Virol. 52, 172-182, 1984
A.Fitle: Nucleotide acid sequences of the oncogen
A.Reference number: A93003; MUID:85009850; PMID:87MOLECULE type: DNA

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       OM protein - protein search, using sw model
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Total number of hits satisfying chosen parameters:
         Pred. No. 1s the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

RT "Cloning of a structural and functional homolog of the circadian clock RT gene period from the giant silkmoth Antheraea pernyi.";

RL Neuron 13:167-1176(1994).

CC -1- FUNCTION: INVOLVED IN THE GENERATION OF BIOLOGICAL RHYTHMS. THE CC PLOCALIZATION OF THE TIM-PER COMPLEX. LIGHT INDUCES THE DEGRADATION OF THE TIM-PER COMPLEX. LIGHT INDUCES THE DEGRADATION OF PER. NUCLEAR ACTIVITY OF THE CC LOCALIZATION OF PER. NUCLEAR ACTIVITY OF THE CC HETERODINER COORDINATIVELY REGULATES PER AND TIM TRANSCRIPTION CC NEGATIVE FEEDBACK LOOP. DOES NOT APPEAR TO BIND DNA, SUGGESTING INDIAECT TRANSCRIPTIONAL LOOP. DOES NOT APPEAR TO BIND DNA, SUGGESTING INDIAECT TRANSCRIPTIONAL INTESTION (BY SIMILARITY). EXPRESSION CC INDIAECT TRANSCRIPTIONAL INTESTION OF THE ADDUCT HEADS AND IN CC EXHIBITS PROMINENT CIRCADIAN VARIATION IN ADULT HEADS AND IN CC SUBUNIT: FORMS HETERODINER WITH TIMELESS (TIM); THE COMPLEX THEN CC SUBUNIT: FORMS HETERODINER WITH TIMELESS (TIM); THE COMPLEX THEN CC SUBUNITARITY. NUCLEUS (BY SIMILARITY).

CC INTERACTION WITH TIM IS REQUIRED FOR NUCLEAR LOCALIZATION (BY SIMILARITY).

CC INTERACTION WITH TIM IS REQUIRED FOR NUCLEAR LOCALIZATION DOMAINS.

"A phosphatidylinositol-linked peanut agglutinin-binding glycoprote in central nervous system myelin and on oligodendrocytes.";

J. Cell Biol. 106:1273-1279(1988).

-I- FUNCTION: CELL ADHESION MOLECULE CONTRIBUTING TO THE INTERACTIV PROCESS REQUIRED FOR MYELINATION IN THE CENTRAL NERVOUS SYSTEM.

-I- SUBCELLULAR LOCATION: Attached to the membrane by a GPI-anchor.

-I- TISSUE SPECIFICITY: OLIGODENDROCYTES AND MYELIN OF THE CENTRAL NERVOUS SYSTEM.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   "Structure and chromosomal localization oligodendrocyte-myelin glycoprotein."; J. LINKED BY A DISULFIDE BOND.

TISSUE SPECIFICITY: LIVER.

DOMAIN: CRARF HAS A MODULE ORGANIZATION SIMILAR SIMILARITY: BELONGS TO PEPTIDASE FAMILY S1.

SIMILARITY: CONTAINS 2 SUSHI (SCR) DOMAINS.

SIMILARITY: CONTAINS 2 CUB DOMAINS.
                                                                                                                                                 Chem. Blophys. Res. Commun. 190:681-687(1993).

FUNCTION: COMPONENT OF THE BACTERICIDAL RA-RACTIVE FACTOR RARF WHICH SPECIFICALLY BINDS TO RA AND R2 POLYSACCHARIDES EXPRESSED I CERTAIN ENTEROBACTERIA. IT TRIGGERS THE ACTIVATION OF COMPLEMENT CASCADE BY ACTIVATING THE C4 AND C2 COMPONENTS. IT ACTIVATES THE C4 COMPONENT BY CLEAVING THE ALPHA-CHAIN OF C4.

SUBUNIT: RARF CONSISTS OF A COMPLEMENT-ACTIVATING COMPONENT (CRARF) AND A POLYSACCHARIDE-BINDING (MANNOSE-BINDING) COMPONENT. CRARF IS AN HETERODIMER OF A HEAVY (P70) AND A LIGH CHAIN (29)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        TP--DTKSKVYLRTPNWDRGLPSLTSVSWNISVPRDQVACLTFFKERSGVVCQTGRAFMI

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        SUBCELLULAR LOCATION: Type I membrane protein.
TISSUE SPECIFICITY: FOUND IN MOST TISSUES.
PTM: AUTOPHOSPHORYLATED ON SERINE AND THREONINE RESIDUES.
SIMILARITY: BELONGS TO THE SER/THR FAMILY OF PROTEIN KINASES.
SIMILARITY: CONTAINS 9 LEUCINE-RICH REPEATS (LRR).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           FUNCTION: PROBABLE
